OBJECTIVE

Computer Science graduate with strong fundamentals in OOP and web development. Built multiple full-stack projects using HTML, CSS, JS, React and Django. Passionate about writing clean, scalable code and solving real-world problems.

EDUCATION

B.SC Computer Science

2022 – 2025

manonmaniyam suntharanar University

SKILLS

- Languages: Python, JavaScript
- Frontend: HTML, CSS, React
- Backend: Django
- Database: MySQL, PostgreSQL
- Tools: Git, GitHub, VS Code
- Core Concepts: DSA, OOP, DBMS, OS

PROJECTS

Django E-Commerce Project

- Developed a full-stack eCommerce web application with cart system and user authentication.
- Integrated secure authentication and role-based access control with Django's built-in auth system.
- Structured the codebase into modular apps, added context processors and URL routing and migrations to ensure maintainability and scalable development.

Job Portal Website

- Built a full-stack job portal application using React for frontend and Django REST Framework for the backend, enabling users to register, log in, browse job listings, and submit job applications.
- Designed a RESTful API with multiple endpoints for user authentication, job management, and application tracking with status workflows.
- Implemented responsive frontend components using React Router for navigation and Tailwind CSS for styling, with pages for registration, login, job browsing, and job applications.

CERTIFICATES

- Python Intermediate Certificate (Hacker Rank)
